ABSTRACT

This basic vocational related skills assessment module in health occupations is one of sixteen modules designed to help teachers assess and identify some of the areas in which special needs students may encounter learning difficulties. The materials in the module allow for informal assessment in three basic areas: academic skills, motor skills, and vocational interest and awareness. The basic skills assessment includes reading skills, listening skills, using a book to locate information, and mathematics. The reading section offers materials written at two different reading levels: the first paragraph is easy (4-8), while the second paragraph is more difficult (9-12). The motor skills are assessed through teacher observation and recording on a matrices skills checklist. The third area, vocational interest and awareness, is assessed through a vocational awareness questionnaire completed by students. (LRA)

DESIGN AND IMPLEMENTATION OF AN ASSESSMENT MODEL FOR STUDENTS ENTERING VOCATIONAL EDUCATION PROGRAMS IN THE STATE OF COLORADO

Each learner should be considered as unique. All students have unique characteristics which are considered by alert teachers in their efforts to foster more effective learning. This is especially true in vocational programs where our opportunities to know each learner are greater than in some other classroom situations.

Douglas Towne
Sydney Wallace

The purpose of this project was to develop materials that could be utilized for informal assessment of students in vocational programs. The materials were then developed into a series of sixteen modules representing the seven service areas of vocational education. These modules will enable teachers to assess and identify some of the areas in which special needs students may encounter learning difficulties.

This project and the resulting modules are based on the assumption that one of the ways that vocational education can provide training "appropriate to the needs and progress of each ... individual," is to assess the needs of each individual. Another assumption is that "modifying" a vocational program may be done in many ways but cannot be done effectively until assessment of student needs has been completed. The modules will provide information that will enable vocational teachers to modify their materials or lessons based on the results of the assessment information.

Information which you obtain from the assessment may be used in the following ways:

grouping of students with similar instructional needs
placement of students in programs
modification of instructional materials
writing goals and objectives for the student
obtaining remedial help
as a model to devise your own materials
writing contracts for behavioral change
giving specific information to supplemental services or support staff for assisstance

Identification of learning problems clarifies the various level of abilities and the learning styles of students. This necessitates individualizing vocational programs and instruction.

The modules include basic academic skill assessment, motor skill assessment, and interest assessment.

The following vocational areas are included in the modules:

1) *Welding*
2) *Sheet Metal*
3) *Agriculture*
4) *Graphic Arts*
5) *Woodworking*
6) *Automotive*
7) *Autobody*
8) *Drafting*
9) *Health Occupations*
10) *World of Work*
11) *Food Preparation*
12) *Child Care*
13) *Distributive Education*
14) *Electricity*
15) *Horticulture*
16) *Business and Office Occupations*

The assessment of student abilities are important for success in the vocational classroom. The basic skills assessment includes Reading Skills, Listening Skills, Using a book to locate information, and Mathematics. The mathematics section covers many of the basic operations and applications of math that is needed in vocational classes.

The reading section offers paragraphs written at two different reading levels; the first paragraph being easy (4-8), the second paragraph more difficult (9-12). Those students who have trouble with both paragraphs will find it difficult to learn through reading.

As a result of the field testing comments, there are two areas which are only included in the module entitled, World of Work. These two areas are "Following Directions" and "Safety Warnings Quiz". They were judged too "easy" for inclusion in all modules. This module was written specifically for students in disadvantaged and handicapped programs.

Materials are color coded for ease of usage and efficiency.

Yellow - *Student Sheets*
White - *Vocational Awareness Questionnaire*
Salmon - *Matrices*
Green - *Teacher Materials*
Gold - *Class Scoring Sheets*

DAILY LIVING COMPETENCIES

PERSONAL CHARACTERISTICS

WORK APTITUDES

MOTOR SKILLS

MATRICES
SKILLS CHECK LISTS

DIRECTIONS TO THE TEACHER:

* This section is designed to assess capabilities that are not easily quantifiable. Therefore, you will use these as observation instruments.
* More than anything else, these are to be used as diagnostic tools to help establish goals and objectives.
* Using the matrices, observe the student over a period of several weeks in several different situations.
* There are many reasons for poor or below average levels of performance. These may include environmental influences and health, i.e., stress, nutrition, physical limitations. The matrices are merely a guide to reflect how well a student is doing in your area.

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT MATRIX SKILLS CHECK LIST															
DAILY LIVING COMPETENCIES:															
Can give personal information															
Money concepts															
Transportation abilities															
Job seeking skills															
Completes work															
Understands directional terms															
Understands safety rules															
Demonstrates cooperation with others															
Punctuality															
Attendance															

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT MATRIX SKILLS CHECK LIST																
PERSONAL CHARACTERISTICS:																
Grooming																
Personal Hygiene																
Physical Tolerance Full Workday																
Peer Relationships																
Self Confident																
Works Well Alone																
Works Well in Group																

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

STUDENT / MATRIX SKILLS CHECK LIST															
WORK APTITUDES:															
Follows Written Instructions															
Follows Verbal Instructions															
Follows Demonstration															
Retains Instructions															
Improves with Repetition															
Conceptualizes the Problem															
Follows Multi-stepped Instructions															
Uses good judgement															

DIRECTIONS: Please check the level each student is at according to the following scale.

1. poor
2. below average
3. average
4. good
5. very good
6. n/a

MOTOR SKILLS:																	
Perform Manipulative Tasks																	
Move Around Objects																	
Use Large Tools																	
Small Motor-eye-hand Coordination																	
Two Hand Coordination																	
Use Small Tools																	
Finger Dexterity																	
Steady Work Pace																	
Heavy Lifting																	

READING SKILLS

DIRECTIONS TO THE TEACHER:

This instrument is designed to assess how well the student understands written materials. The skills are broken into vocabulary, (Question 1-5), main ideas, (Question 6), details or facts, (Question 7), and inference or logical deduction, (Question 8).

1. Have students read each paragraph and then answer the questions on the following page. The students may refer to the original paragraph while completing the questions. (Time: approximately 15 minutes).
2. Collect all sheets.
3. Correct worksheets.

Vocabulary

a. For each vocabulary word listed (Questions 1-5), the student should leave a definition or synonym that shows an understanding of the word as it is used in the sentence. Score vocabulary questions as one (1) point each. Five (5) is a perfect score; zero (0) means none are correct.

Main Idea

b. In Question Six (6) you will assign a score of 1-5. The score should be based on how completely the student comprehends the paragraph.
   1) little knowledge or comprehension
   2) some grasp of paragraph
   3) fair idea of paragraph's content
   4) good idea of paragraph
   5) description which tells what the whole paragraph is about

Details

c. In Question Seven (7) a full score, five (5) points, should be based on whether the student puts down the two important facts.
   1) any one fact in the paragraph
   2) any two facts in the paragraph
   3) one fact that answers the statement well
   4) one fact that answers the statement well and any one that is in the paragraph
   5) Two facts that answer the statement well

Inference

d. In Question Eight (8) you are looking for an understanding that goes beyond what is in the paragraph.

1) any attempt to answer

2) any answer that even addresses the question

3) some idea of an extension of the basic knowledge

4) 5) a good answer which shows an understanding of the implications of the question.

EXAMPLE: A few words which describe what a good title for the paragraph is about would receive a score of four (4).

4. Total the scores (1-8), for each paragraph.

EXAMPLE:

	Paragraph 1		Paragraph 2		TOTAL
Vocabulary	_____	+	_____	=	_____
Main Idea	_____	+	_____	=	_____
Details	_____	+	_____	=	_____
Inference	_____	+	_____	=	_____

5. Enter the score from each area and the total on the class scoring sheet.

6. Paragraph one was chosen for student who have lower reading levels. Paragraph two was chosen for students who read at the high school level.

HEALTH OCCUPATIONS
READING SKILLS I

READ THIS PARAGRAPH:

Normally, a well baby eats, sleeps, plays and cries. If an infant suddenly refuses to eat, appears IRRITABLE, DROWSY or restless, or cries as if in pain, it may only be too much excitement, or it may be the beginning of an illness. If temperature EXCEEDS 101°F., diarrhea or vomiting begins, or a RASH or a runny nose develops, the baby should be seen by a physician. If the infant should cry sharply, become stiff or seem unable to move a part of their body or begin to CONVULSE, the infant will need immediate medical attention.

ANSWER THE QUESTIONS ON THE NEXT PAGE

Mrs. Mavis C. Sparks, Exploring Careers in Health Occupations, Curriculum Development Center, Lexington, Kentucky, September, 1975.

(Paragraph revised to reflect sex fair language.)

NAME _____

HEALTH OCCUPATIONS
READING SKILLS I

DIRECTIONS TO STUDENT:

Please tell what the following words mean as they are used in the previous paragraph.

1. IRRITABLE _____

2. DROWSY _____

3. EXCEEDS _____

4. RASH _____

5. CONVULSE _____

VOCABULARY _____ (0-5)

6. What is this paragraph about? _____

MAIN IDEA _____ (1-5)

7. Name two reasons why a child should see a doctor.
   (1) _____
   (2) _____

DETAILS _____ (1-5)

8. Why is it so important to go to a doctor right away? _____

INFERENCE _____ (1-5)

TOTAL SCORE _____

HEALTH OCCUPATIONS
READING SKILLS II

Some of you will see information on a patient's chart. You may have reason to use the chart or to see it by accident. Unless your work REQUIRES you to make NOTATIONS on the chart or to use it in order to give care to the patient, do not read it or even take it from the CHART RACK. The chart is a legal document, belonging to the hospital, and the material in it is known as "PRIVILEGED INFORMATION" --that is, it is very private and is meant only for those people who need it to care for the patient. PRIVACY of everything surrounding the patient is his or her right.

ANSWER THE QUESTIONS ON THE NEXT PAGE

Mrs. Mavis C. Sparks, Exploring Careers in Health Occupations, Curriculum Development Center, Lexington, Kentucky, September, 1975.

NAME_____

HEALTH OCCUPATIONS

7. Name two times you will have to use the chart.
(1)_____
(2)_____

DETAILS_____ (1-5)

8. Why is privacy so important for the patient?_____

INFERENCE_____ (1-5)

TOTAL SCORE_____

LISTENING SKILLS

DIRECTIONS TO THE TEACHER:

This test is designed to indicate how well your students use their auditory skills. They will be listening to a passage that is read two times. Then they will fill in the missing words on the answer sheet.

In order to utilize the Listening Skills Unit, the listening skills paragraph needs to be taped or read to the students by you.

Please read the directions on the student sheets to the class. The students may write on their answer sheets at any time during the two readings. The students should be asked to read the test sheet before listening to the tape.

GRADING:

The number correct is the total number of correct words filled in the blanks. Please accept reasonable substitutes for the words. Overlook poor spelling.

HEALTH OCCUPATIONS
LISTENING SKILLS

Generally, newborn infants spend most of their time in sleep. They lie quietly in their beds and usually curl up with their fists clenched. By the time babies are one month old, they become active. They can raise their heads from their beds when lying face down and their cry has become more expressive of their needs. At two months, infants can raise their chest from their beds, turn positions and follow bright moving objects with their eyes. They turn toward the sound of a voice and turn their heads to follow a toy at three months old. If babies are supported in the sitting position, their backs are rounded, but they hold their heads erect.

PARAGRAPH SHOULD BE READ OR TAPED

ANSWERS

Characteristics of the Newborn Infant

NEWBORN

1. Sleep a lot.
2. Lie in bed.
3. Curl up.
4. Clenches fists.

ONE MONTH OLD

1. Become active.
2. Raise heads.
3. Cry, expresses needs.

TWO MONTHS

1. Raise chest (turn position).
2. Eyes follow moving objects.

THREE MONTHS

1. Turn toward sound of voice.
2. Turn head to follow a toy.
3. When sitting backs are rounded.
4. Heads erect.

LISTENING SKILLS

DIRECTIONS TO STUDENT:

You will hear a passage read from the book just mentioned. The passage will be read once quickly and then again slowly.
Listen carefully to the passage each time it is read. As you listen to the passage being read fill in the blanks. You will fill in the facts that you hear on your answer sheet.

READ YOUR SHEET THROUGH BEFORE LISTENING TO THE TAPE.

NAME_____

HEALTH OCCUPATIONS
LISTENING SKILLS - Student Worksheet

Characteristics of the Newborn Infant

NEWBORN

1. _____ a lot.
2. Lie in _____.
3. _____ up.
4. Clenches _____.

ONE MONTH OLD

1. Become _____.
2. Raise _____.
3. _____, expresses needs.

TWO MONTHS

1. Raise _____ (turn position).
2. _____ follow moving objects.

THREE MONTHS

1. Turn toward sound of _____.
2. Turn _____ to follow a toy.
3. When sitting _____ are rounded.
4. Heads _____.

PARTS OF A BOOK

DIRECTIONS TO THE TEACHER:

Being able to locate information in a book is an important skill in most vocational areas. This test is designed to indicate the student's information locating ability in using a TABLE OF CONTENTS and an INDEX.

The student will use a table of contents and an index from your vocational area to answer five questions for each of the two areas. CAUTION students that the Table of Contents and/or Index may have more than one page. Ask students to check all pages before writing down their answers.

SCORING:

Correct the two parts and enter the total score on the class-scoring sheet.

Example:

Score - Table of Contents . . . . . _____

Score - Index . . . . . + _____

(0-10) _____

HEALTH OCCUPATIONS
PARTS OF A BOOK

ANSWERS:

Table of Contents

1. page(s) 125
2. page(s) 66
3. page(s) 33
4. page(s) 26
5. page(s) 104

Index

1. 7-2
2. 1-18
3. 1-9
4. 9-31, 9-32
5. 9-12

PARTS OF A BOOK

DIRECTIONS TO THE STUDENT:

There will be two parts to this section.

Using a Table of Contents
Using an Index

*Answer the Table of Contents questions by using the Table of Contents that follows.

*Answer the Index questions by using the Index that follows.

NAME_____

HEALTH OCCUPATIONS
PARTS OF A BOOK

TABLE OF CONTENTS:

Using the table of contents answer the following questions.

On which page(s) would you find:

1. How to help a sick child who needs surgery?	1. page(s)_____
2. A child's growth from six to sixteen?	2. page(s)_____
3. Taking the baby home from the hospital?	3. page(s)_____
4. Dental Care?	4. page(s)_____
5. Helping the child in the hospital?	5. page(s)_____

On which page(s) would you find:

1. Brushing patient's teeth?
2. Tumors?
3. Volunteers?
4. Cleaning of tubes?
5. Urinalysis?

INDEX

Supply pack, patient's, usual contents of, 5-3
Surgery, preparing the patient for, 14-1--14-14
  the evening before, 14-5--14-6
  general procedures for, 14-1--14-3
  the morning of, 14-6--14-9
  shaving the patient for, 14-9--14-14
  See also Preoperative care.
Syringe, care of, 4-22. See also Needles.

T Binder, 15-11
Teeth, brushing patient's, equipment for, 7-2
  procedure for, 7-3
Temperature, body, taking of, 10-8--10-16
  by axillary (armpit) method, 10-15--10-16
  Centigrade scale for, 10-9
  Fahrenheit scale for, 10-8--10-9
  by oral method, 10-10--10-12
  by rectal method, 10-13--10-15
Thermometer, defined, 10-8
  holders for, 10-13
  shaking the mercury down, technique, 10-11
  types of, 10-9
Tissues, body, defined, 2-19
  kinds of, 2-19--2-21
  purpose of, 2-18
Tongue depressor, handling of, 12-6
TPR (temperature, pulse, respiration), 10-1--10-26
Transferring the patient, procedures for, 11-7--11-9
Transporting the patient, by stretcher, 6-33
  by wheelchair, 6-28
Tubes, defined, 9-20
  cleaning of, 9-31--9-32
Tumors, defined, 1-18
24-hour urine specimen, defined, 9-16
  collection of, equipment for, 9-16
    procedures for, 9-16--9-17

Unit, isolation. See isolation unit.
Unit, patient's. See patient care units.
Unoccupied bed, cleaning, after patient's discharge, 5-7--5-8
  making, equipment for, 5-11
  making, steps in, 5-12--5-19
    illustrated, 5-12--5-19
Urinal, giving of, equipment and procedures for, 7-29
Urinalysis, 9-12
Urinary catheter, 9-27
  use of, illustrated, 9-27

Urinary system, anatomy of, 9-8--9-9
defined, 2-22, 9-9
diseases and disorders of, 9-9
functions of, 9-9
illustrated, 9-8
organs of, 9-9
Utility room, equipment in, 4-4--4-6
keeping in order, 4-6--4-7

Vaginal douche, defined, 9-40
equipment for giving, 9-41
procedures for giving, 9-41--9-44
procedures illustrated, 9-43
Vaginal prep, 14-11
Viruses, 3-7. See also Bacteria
Vital signs, defined, 10-1
observing and recording, 10-2, 10-8--10-30
See also TPR.
Volunteers, 1-9

Water, drinking, importance of, 8-9, 8-23
function of, in the diet, 8-9
passing to the patient, equipment for, 8-24
procedures for, 8-24
restrictions in, 8-23
sources of, 8-9
Wet pack, 13-17
Wheelchair, safety precautions for, 6-28--6-29
transporting patient by, 6-28

MATHEMATICS TEST

DIRECTIONS TO THE TEACHER:

This test is designed to assess skill areas that might be needed in a vocational class.

The skills cross vocational areas.

The first ten questions comprise a basic skills assessment. The rest of the test uses various kinds of skills in diverse mathematical areas.

A student should not spend too much time on any one problem. He/she should be given extra time if necessary.

1. Allow one hour for students to complete this test.
2. Score the answers on the students' test.
3. Subtract the number missed from forty-two (42).
4. Enter the score on the class scoring sheet.

It is easy to tell which areas a student is weak in by referring to the test itself.

This is important when there are only a few wrong.
